• English

PROFILE INFO

I have 9+ years of experience in all kinds of eras in web development (Frontend and Backend). Well versed in JavaScript, PHP and Python frameworks such as React, Angular, Vue, Laravel, CodeIgniter, Django and Flask. I am seeking a challenging position as a JavaScript/PHP/Python Developer with a dynamic organization where by my experience and interpersonal skills can be fully utilized and further enhanced.

WORK EXPERIENCE

Full Stack Developer

2022 - 2023

Journeyfront

- Created wire frames and UX/UI responsive design, and implemented designs into Vue and Django applications.
- Created RESTful API's, or manage integration with external API's using Django REST frameworks.
- Developed and extended proprietary python based software and the custom front marketplace plugins and administrative portion.
- Managed, developed, and designed a dashboard control panel for customers and Administrators using Django, Oracle DB, PostgreSQL and REST API calls.

Senior Full Stack Developer

2020 - 2022

CEI

- Worked on several web applications and created web tools from scratch using JS/PHP/Java frameworks such as React, Angular, Laravel and Spring Boot.
- Designed the complete structure of the React front end and designed optimized modules.
- Implemented a fully responsive front end using React and MUI.
- Implemented Redux along with React for state manipulations and dispatched actions in the project.
- Planned and re-engineered a legacy application into a modern Laravel and Angular. js-based software. Together with the subject matter experts developed the requirements for new features and functionalities based on the latest government regulations and led the team of in-house and offshore developers and testers to implement the final product.
- Primarily, I build Laravel s websites by turning our designer's mockups into a reality and then making informed decisions on how to handle keeping the layout responsive for all screen sizes and browsers.

① **Full Stack Developer** **2018 - 2020**

V-Soft Consulting Group, Inc.

- Frontend Dashboard with React, Vue and Angular.
- Developed authorization workflow, dashboard of traffic system on Ann arbor and so on, Analytics, Warnings, and Violations page
- Using Google Map API, implemented Adobe XD design to perfect UI.
- Using Web socket, display real-time data for vehicles and traffic signals.
- Unit and e2e testing with Jest.
- Backend with Laravel and custom PHP script
- Analysis of all traffic signal data and vehicles moving.
- Data collecting using Python script
- Implementation of real-time notification
- AWS lambda API

② **Senior Front End Developer** **2015 - 2018**

9thWonder Agency

- Web Portal Using React, AngularJS and Angular 2+.
- Developed the login flow, preference setting, and multi-profile use support for the web portal using React, and Redux-saga.
 - - Server Side Rendering using Typescript and Next.js to get fast loading speed.
 - Developed brand creation flow, business modal flow, use invitation flow by using Java, postman, and swagger API.
 - Developed the scheduling event, calendar action, and time zone display for faster setup of the meeting and call event

③ **jQuery/Ajax/PHP Developer** **2012 - 2015**

KORE1

- Used programming capabilities in PHP, MySQL and JavaScript/jQuery and other libraries as needed
- Analyzed requirements and designed, developed and implemented software applications for multiple websites
- Implemented Google Campaigns and SEO for various types of websites
